

WGP Health, safety and environment

Environmental policy

Definition and company commitment

WGP Group’s mission is to deliver proficient marine geophysical services in both the exploration and production sectors within the upstream oil and gas industry. Our technical expertise means we can take our clients’ ideas and turn them into safe and effective operations.

We believe that all incidents are preventable and that there should be a minimal impact to the environment in our day-to-day operations. Through our meticulous preparation and planning we take all reasonable steps to ensure the prevention of pollution and the protection of the natural world.

We understand the importance of environmental protection and are compliant with all legal requirements of working in geophysical industry and the local surroundings.

At WGP we run an integrated management system, which is compliant with ISO14001:2015. This involves regular management review, risk-assessment, and direct leadership – all key elements to effective environmental management.

Our core values are:

- Zero harm to health, safety and the environment.
- A quality and responsive service to our clients.
- Delivering shareholder value.
- Personnel integrity and professionalism.

Communication

The company’s employees, its contractors and partners under our operational control must maintain this commitment to the environment. We will ensure that all parties have read and understood this document.
