

# WGP Quality management

## Quality policy

### Definition and company commitment

WGP Group’s mission is to deliver proficient marine geophysical services in both the exploration and production sectors within the upstream oil and gas industry. Our technical expertise means we can take our clients’ ideas and turn them into safe and effective operations.

We will not only meet client requirements but strive to exceed them. Our company ethos is to continuously improve on the level of service we are providing; to put forward new ideas, break down boundaries and seek new solutions for WGP and our customers. We always encourage a proactive outlook, pushing new technologies and methods to achieve this.

WGP provides a safe and efficient service managed by experienced and capable people. Our quality performance allows us to create long-term associates by being accessible and able to constantly deliver quality and value.

At WGP we run an integrated management system, which is compliant with ISO9001:2015. This involves regular management review, risk-based thinking, and direct leadership – all key elements to effective quality management.

Our core values are:

- Zero harm to health, safety and the environment.
- A quality and responsive service to our clients.
- Delivering shareholder value.
- Personnel integrity and professionalism.

### Communication

This policy is required reading for all staff. It is important that our vision for the company is not only communicated to our clients but embodied by our personnel.

Tom Scoulios  
Director
